

# Join us for a thought-provoking scientific session at CSCC! Closing the seronegative gap in Autoimmune Testing

New markers hold great potential to improve care of Autoimmune diseases. We will discuss the advent of new markers for Connective Tissue Disease, Rheumatoid Arthritis, Antiphospholipid Syndrome, Myositis and Autoimmune Liver Disease which help close the seronegative gap. We will also introduce a new advanced technology for multi-analyte testing in Autoimmunity.

## SPEAKER:

### **Marvin Fritzler, MD, PhD**

Dr. Fritzler is a Professor of Medicine at the University of Calgary with research interest in clinical immunology. He directs autoantibody testing at the Mitogen Advanced Diagnostics Laboratory.

**VISIT US AT BOOTH # 7**
